

2010 Construction Projects

Major Street Projects

- **Downtown - Campus Connection**

The City may be installing bike lanes and constructing an enhanced, lighted pedestrian path on Main Street between Illinois and Bellows Streets. Washington Street between Illinois and Bellows Streets will convert from one-way traffic to two-way traffic.

- **Michigan Street**

The City will be reconstructing Michigan Street between Fancher and Mission Streets. The reconstruction will involve narrowing the street, installing bike lanes, and creating bump-out parking. The project will involve removing the existing pavement and curb and gutter, and excavating two feet deep. The street will be reconstructed with new sand, gravel and asphalt.

Local Street Projects

- **Ridge Street (Crescent to Watson)**

The project will involve removing the existing pavement between the curb and gutter, and excavating two feet deep. The street will be reconstructed with new sand, gravel and asphalt.

- **Russell Street (Pickard to Crosslane)**

The project will involve removing the existing pavement between the curb and gutter, and excavating two feet deep. The street will be reconstructed with new sand, gravel and asphalt.

- **Main/University Alley (Illinois to Michigan)**

The project will involve removing the existing pavement and excavating two feet deep. The alley will be reconstructed with new sand, gravel and asphalt.

Asphalt Overlays

- **East Grand (Crosslane to Broadway)**
- **West Grand (Crosslane to Broadway)**
