* Per Traffic Safety Corp., the Solar LED Flashing School Crossing signs included in the proposal are wireless and contain built-in timeclock control cabinets, software programming kits, and blinker beam wireless controllers. They were included in the unit bid price for the sign.

*** Per Western Remac, Inc., the company submitted a bid for 8 timeclock control cabinets at \$878.00 each instead of the requested quantity of 16. This is because the timers included can control the other signs at the location wirelessly.

**Round posts not sold by this company, but mounting hardware is included.
